mango-rekey - RSA Key Generation for Mango Publishers

This Python script generates RSA key pairs for each publisher in a Mango JSON file,
saves the keys in separate files within a structured directory following the
UDMI site model data structure, and updates the JSON file with the new key values.

Usage

1. **Clone the repository:**

```
git clone [https://github.com/your-username/your-repository]
(https://github.com/your-username/your-repository)
```
